

COMPANY	BOOTH	DESCRIPTION
Accudyn	4171	Committed to zero defect manufacturing and flawless delivery, Accudyn specializes in highly engineered injection molding for customers around the world.
ADMEDES	3019	ADMEDES GmbH is a leading global provider of finished Nitinol self-expandable components to the medical device industry. The company collaborates with clients on their designs to develop, commercialize, and produce Nitinol and other metal medical implants and device components that meet stringent ISO and FDA standards.
Ascential	3213	Aspect Automation designs and builds custom automated manufacturing equipment for leaders in life sciences, industrial components, and consumer products. It provides innovative build-to-print and system integration services, and specializes in engineering to increase manufacturing efficiency. It has extensive experience with complex control systems, product tracking, data management, vision inspection, project management, and validation support.
ATL Technology	1921;1923; 2020;2022	ATL Technology is a design, development, and manufacturing partner for leading medical device OEMs globally. We leverage our engineer-to-engineer approach and deep experience in energy-driven medical devices to develop custom solutions that bring products to market faster and help improve patients' lives.
Biomerics	2201	Biomerics specializes in the design, development, and production of medical devices for minimally invasive diagnostic and interventional procedures. The company's advanced catheter division is focused on next-generation solutions for the cardiovascular, structural heart, cardiac rhythm management, electrophysiology, and vascular access markets. Biomerics offers a portfolio of material, injection molding, extrusion, and secondary assembly.
Cadence	1801	Cadence is a vertically integrated, medical device contract development and manufacturing organization serving the medical device, diagnostics, and drug delivery markets, providing best-in-class product design and development support through complete manufacturing of finished devices. Cadence employs approximately 800 people worldwide with its corporate headquarters in Staunton, Virginia and additional locations in Connecticut, Pennsylvania, Rhode Island, Wisconsin, Florida, and Costa Rica. Stop by Cadence's booth #1801 to learn more about how we can help bring your new product to life.
Cirtec Medical	1477	Cirtec Medical provides outsourcing solutions for active implants and minimally invasive therapeutic devices. From design and development, to precision components and finished device assembly, Cirtec has the experience needed to bring complex devices to market. Cirtec's expertise includes neuromodulation, implantable drug delivery, cardiac rhythm management, mechanical circulatory support, minimally invasive surgical systems and TAVR/TMVR.
Confluent Medical	1812	Confluent Medical Technologies is dedicated to working collaboratively with its customers, taking their projects from rapid prototype into high-volume production. The company's technical expertise, proven experience, and partnership with its clients have allowed it to perfect the process necessary to deliver world-class medical devices through innovative material science, engineering, and manufacturing.

COMPANY	BOOTH	DESCRIPTION
CRETEX Medical	3315	Cretex Medical provides contract manufacturing and engineering services. Our family of companies specialize in a broad range of services, including machining, additive manufacturing, custom instrument manufacturing, design and fabrication of cases & trays, injection molding, precision metal stamping, laser processing, finished device assembly, sterile packaging, and sterilization management.
De Royal	2446	DeRoyal OEM is an OEM services provider to the medical industry, specializing in custom injection-molded plastics and custom adhesive-backed and die-cut components. The company is a global supplier of more than 25,000 medical products and services, with 2,000 employees worldwide. Products include a full line of stopcocks, manifolds, control syringes, wound care supplies, and surgical accessories.
EW Manufacturing	3888	East West's global team serves a broad spectrum of dedicated end markets knowing that the quality products made today can truly make a difference for all of us. We leverage cross-industry expertise to develop custom design, manufacturing, and supply chain solutions tailored to each customer's specific requirements.
Freudenberg Medical	2609	Freudenberg Medical is a global partner for the design, development, and manufacture of medical devices, components, and product solutions. With 11 manufacturing operations and more than 1,500 associates worldwide, Freudenberg Medical offers a wide range of manufacturing capabilities, from high-precision silicone and thermoplastic components and medical tubing to drug coatings, hypotubes, finished devices, and subassemblies for catheters and minimally invasive devices.
GW Lisk	1930	Tico Electronics is a Costa Rican Contract Manufacturer specializing in complex assemblies that require both machine and human interface, and which benefit from production flexibility. We tailor your business needs by creating customized assembly lines.
Harland Medical	3739	Harland Medical Systems Inc. is the industry's only comprehensive source for hydrophilic and antimicrobial coatings, process development, coating & testing equipment, coating & testing services, support & maintenance. Harland is uniquely positioned to provide everything you need to coat your medical device on time and on budget.
Heraeus Medavio	2001	At Heraeus Medevio, we improve lives by serving our customers to bring better medical devices to market, faster. The expertise and precision we bring to our products and processes can't always be seen. But it can be felt. It can be trusted. By our partners and the patients who rely on them for lifesaving and life-changing medical devices.
ICU Medical	2434	ICU Medical OEM provides outsourcing solutions to pharmaceutical and medical device manufacturers around the world. Featured products include fluid control devices, needle safety devices, and delivery sets, monitoring technology, custom-manufactured silicone products, and interventional imaging components. Services include molding, extrusion, assembly, packaging, sterilization, and private labeling.

COMPANY	BOOTH	DESCRIPTION
Merrills Packagings	2254	Merrill's Packaging Inc. has more than 40 years' experience providing custom thermoformed sterilizable packaging for the medical device industry. Materials used include PETG, PP, HDPE, HIS, APET, and high-heat polycarbonate. Class 100,000 cleanrooms are used. The company offers in-house packaging design and tooling services, and operates under ISO 13485;2016 quality systems. Merrill's Packaging also operates a thermoforming factory in Costa Rica.
MICRO	1739	MICRO is a full-service contract manufacturer of medical devices and subassemblies, including injection/insert molding, MIMs, and fabricated tube assemblies. The company offers product development and design assistance from prototyping and validation to full-scale production. Modern facilities are cGMP-QSR compliant and ISO 9001, ISO 13485, and ISO 14001 certified. MICRO maintains an ISO Class 8 cleanroom for surgical instrument assemblies.
Nelipak	1455	Nelipak® Healthcare Packaging designs, develops, and manufactures custom thermoformed packaging products that provide superior protection for medical devices and pharmaceuticals, including medical trays and blisters, surgical procedure trays, pharmaceutical handling trays, custom-built sealing machines, and other value-added services. The company delivers superior quality through world-class manufacturing at each of its global locations.
Pacific Barcode	4942	Pacific Barcode is a complete label solutions partner featuring stock and custom labels for ink-jet, thermal direct, and thermal transfer printers. It offers preprinted labels, color label printers, thermal transfer printers, service, support, inks, ribbons, and printheads. In addition, the company is a complete custom manufacturer of warehouse labels and signs, including LPN labels.
Prent	2139	Prent Corporation is the premier global supplier of innovative, reliable, and sustainable thermoform packaging solutions for the medtech industry. Prent's greenfield global services include in-house product development and design, tool build, and class 7 and 8 clean room production on Prent-designed and built thermoformers.
PRMC	1468	An international company based in Costa Rica focused on providing the best service and quality for the medical device industry with reliable and creative solutions for our customers' requirements, through a strong team of Engineers with vast experience and proof record of success in the field.
Resonetics	3301	We partner with MedTech companies to bring life-changing technologies to market faster. With decades of experience in precision manufacturing, Resonetics® provides comprehensive solutions in nitinol processing, laser processing, metal fabrication, raw materials, sensors, medical power, and more. Through our LightSpeed Labs® and AGILE Product Development® teams, we accelerate product development from concept to commercialization with rapid prototyping, design support, and close collaboration. Our global team of engineers is dedicated to solving complex challenges with advanced technologies and a commitment to quality that improves patients' lives.

COMPANY	BOOTH	DESCRIPTION
Riverpoint Medical	1539	They specialize in the design & manufacturing of premium Medical Devices within Medical, Dental & Veterinary markets.
SMC Ltd	3435	SMC Ltd. is a global leader in contract manufacturing for the medical device, diagnostics, and pharmaceutical industries. With over 35 years' experience, SMC provides high-quality products and services that meet the strictest regulatory standards. Services include device design and development, engineering, molding, complete device assembly, testing and validation, sterile filling, supply chain management, assembly, label and packaging, and sterilization management.
Smiths Interconnect	2487	Smiths Interconnect is a leading provider of technically differentiated electronic components, subsystems, microwave, optical and radio frequency products that connect, protect and control critical applications in the commercial aviation, defense, space, medical, rail, semiconductor test, and industrial market segments.
Specialty Coating Systems	1807	SCS is a world leader in Parylene, liquid, plasma, ALD and multilayer conformal coating services and technologies with over 50 years of experience and 21 worldwide locations, including 9 in the Americas, 5 in Europe and 7 in Asia. SCS conformal coatings offer excellent moisture, chemical and dielectric barrier properties to protect components in the medical device, defense, aerospace, electronics and automotive industries.
Steris	2039	STERIS Applied Sterilization Technologies is a global provider of contract sterilization, laboratory testing and product and packaging testing services; and integrated sterilization equipment, control systems, and radiation dosimetry to support medical device and pharmaceutical manufacturers.
Switchback Medical	1283	Switchback Medical brings your device designs to life with the help of our expert team. We provide customers with the confidence to design and manufacture innovative medical devices that grow and revolutionize their business.
TE Connectivity	3401	TE Connectivity's Medical business is the partner of choice for the world's leading medical technology brands. We provide top-tier engineering expertise and manufacturing excellence in the development of optimally engineered components and value-added sub-assemblies to support the production of life-saving medical devices used in interventional cardiovascular, surgery, imaging, neuroendovascular surgery, and other medical specialties.

COMPANY	BOOTH	DESCRIPTION
Tegra Medical	2313	An end-to-end solutions provider, Tegra Medical offers contract manufacturing, from DFMA and prototyping to production of components and complete finished devices with full assembly and packaging. Specialties include MIS, interventional, orthopedic, and spinal devices. The company has 230,000 sq ft in Boston, Memphis, and Costa Rica. It ships wire and hypotubing overnight. ISO 13485:2003 and FDA QSR compliant. Visit its booths for more details.
Tekni-Plex	2801	TekniPlex Healthcare utilizes advanced materials science technologies and expertise to develop critical solutions for medical and diagnostic devices, drug delivery systems and healthcare packaging applications.
Trelleborg Medical Solutions	2911	Trelleborg designs, develops, and manufactures innovative solutions for healthcare and medical applications in a wide range of polymers. From prototype to final component, it works with clients to supply rubber-molded products, including liquid silicone rubber (LSR) parts, tubing and hose, spring energized seals, O-rings, diaphragms, bearings, bushings, subassemblies, and custom-engineered solutions for fluid handling and sealing challenges.
Viant Medical	2901	Viant is a trusted global medical design & manufacturing services provider that partners and innovates with life sciences customers to provide the highest quality, life enhancing medical devices. With customer centric program management across 26 locations worldwide, we offer both small-company service and big-company resources.
